the 2019 highlights

Every year, BC Student Outcomes collects feedback from former students who took post-secondary programs. Student feedback is essential to maintain quality and relevance in the education system.

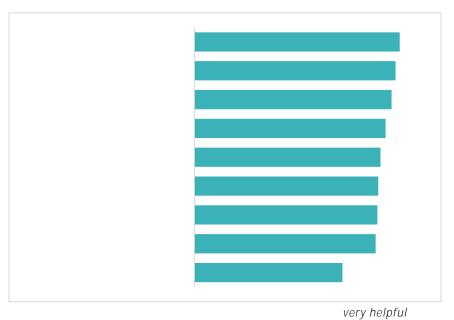

Outcomes surveys are conducted with funding from the Ministry of Advanced Education, Skills and Training, the Industry Training Authority, and from British Columbia's public post-secondary institutions. In 2019, over 28,000 former students were surveyed; key results from those surveys are presented here.

In 2019, 92 percent of the former post-secondary students surveyed were satis ed or ver satis ed with the education or training they received.
